Global Talent Visa

Profile

Applied AI engineer, founding CTO, and solutions architect with 13+ years taking complex systems from discovery to production. Built GenAI products from zero to one, scaled ML and financial infrastructure at Wix and Revolut, and delivered cloud and AI work across startup, enterprise, and public-sector environments. Hands-on across customer discovery, architecture, evaluations, implementation, and production rollout. Expert at the Ukrainian Startup Fund (USF), hackathon judge, and volunteer mentor to founders.

Selected AI & Regulated Delivery

- | | |
|-------------------|---|
| Public-sector AI | Designed an LLM benchmark, evaluation criteria, technical proposal, and integration approach for a Luxembourg government RFP through Prefix Tree. |
| Regulated systems | Built a CBDC prototype for the National Bank of Ukraine that received sandbox approval; later delivered production financial infrastructure at Revolut. |

Experience

- | | |
|---------------------|---|
| Aug 2025 - Present | Founding Engineer, Solea AI <ul style="list-style-type: none">○ Took an AI-native field service platform from customer discovery to production within six months, spanning CRM, scheduling, billing, payments, and communications○ Scaled the payments platform to over \$1M in monthly processing volume within two months of launch○ Own customer onboarding and billing infrastructure, taking operators from data migration and configuration through production rollout○ Designed the event-driven platform for AI voice agents, call analytics, reproducible evaluations, and safe production releases○ Tech: Python, PostgreSQL, LLMs, Next.js, Timefold |
| Jan 2025 - Aug 2025 | CTO & Co-Founder, Odocs (startup) <ul style="list-style-type: none">○ Built an agentic documentation platform that regenerates docs from source code○ Designed language-agnostic parsing system for million-line codebases using Tree-Sitter and Stack-Graphs○ Implemented incremental documentation refresh with open-source LLMs, reducing manual documentation work by 80%○ Tech: TypeScript, Python, Rust, Tree-Sitter, LangGraph, Llama 3, Angular, AWS |
| Feb 2024 - Dec 2024 | CTO & Co-Founder, Redress (startup) <ul style="list-style-type: none">○ Took a GenAI fashion styling engine from prototype to launch; won a startup pitch competition○ Achieved 44% better styling match vs Farfetch baseline in blind user study (n=60)○ Secured partnerships with Kooheji Group (Bahrain) and generated first revenue○ Tech: React, Next.js, Python, FastAPI, Weaviate, PyTorch, LangChain, GCP |
| Oct 2021 - Feb 2024 | Senior Software Engineer, Revolut <ul style="list-style-type: none">○ Owned backend infrastructure for B2B trading systems managing high-value portfolios○ Developed real-time data platform used by Treasury and Risk teams○ Partnered with Treasury, Risk, and product teams on performance, reliability, and internal integration○ Tech: Kotlin, Java 17+, PostgreSQL, Iceberg, AWS, Kubernetes |

- Jan 2020 - Oct 2021 **Lead Software Engineer - MLOps, Wix.com**
- Built and scaled vector search infra handling 300K+ RPM and 350M+ docs with sub-100ms latency
 - Designed hybrid retrieval system using BERT + TF-IDF; improved premium conversion by 7%
 - Led Maven → Bazel migration for Vespa integration, enabling reliable e2e testing and faster iteration
 - **Tech:** Python, Scala, Vespa, GKE, AWS, Airflow
- Jan 2019 - Jan 2020 **Solutions Architect & Customer Engineer, SoftServe**
- Led technical discovery and architecture workshops with senior stakeholders for an enterprise telecommunications client
 - Migrated Europe's largest GCP client from AWS to GCP as the primary technical liaison for Big Data architecture and hands-on implementation
 - **Tech:** Scala, Cassandra, Python, Java, Ruby, Spark, Druid, GCP, AWS, SQL, Terraform
- Apr 2018 - Jan 2019 **Lead Software Engineer, Qvantel**
- Led development of Akka-based microservices platform for Tier-1 telecommunications operator
 - Led and mentored three engineers through a critical digital-transformation milestone
 - **Tech:** Scala, Akka, Cassandra, Docker, Kubernetes
- May 2017 - Jan 2018 **Software Engineer, xtendx AG**
- Optimized video analytics engine, cutting bandwidth by 3 Mbps and infrastructure costs by 15%
 - Migrated CI/CD from SVN to Git with automated tests, increasing developer velocity by 25% and cutting deployment failures by 40%
- Jul 2015 - May 2017 **Senior Software Engineer, EPAM Systems**
- Built POS system deployed across 400+ Canadian Tire stores, processing 100M+ USD annually
 - Integrated Moneris payment gateway with PCI DSS compliance and fraud detection
 - **Tech:** Java, Spring, Oracle
- Jul 2013 - Jul 2015 **Software Engineer, SoftServe**
- Promoted from intern to full-time engineer within 6 months on Bazaarvoice engagement
 - **Tech:** Java, Hadoop, Apache Pig, AWS

Education

- Sep 2024 - Dec 2024 **Startup Accelerator, University College London (UCL)**
- 2016 - 2018 **B.S. Computer Science, Dnipro Polytechnic, Ukraine**
- 2007 - 2012 **M.S. Economics, National Mining University, Ukraine**

Technical Skills

Infra & Scale: Real-time systems, distributed services, search infra, observability, CI/CD

Cloud & DevOps: AWS, GCP, Terraform, Kubernetes, Docker, GitHub Actions

LLM/AI Tooling: Agentic systems, evaluations, LangGraph, LangChain, OpenAI APIs, Llama, Mistral

Languages: Kotlin, Python, Scala, Java, Go, Rust, TypeScript

Data: PostgreSQL, Vespa, Airflow, Spark, Iceberg, BigQuery

Delivery: Customer discovery, solution architecture, prototyping, production rollout, technical workshops
